Information technology (IT) is the application of computers and telecommunications equipment to store, retrieve, transmit and manipulate data. The term is commonly used as a synonym for computers and computer networks, but it also encompasses other information distribution technologies such as television and telephones. Today Lithuania is already ahead of the Nordic countries and for six years in a row the country has been the European leader in fiber-optic Internet network penetration. It has the fastest in the world public Wi-Fi, according to latest Rotten Wi-Fi survey. World class digital infrastructure was created.

Crafts – traditional profession that requires particular skills and knowledge of skilled work. The products usually are made completely by hand or non-automatic machines.

Crafts are made using natural materials: wood, metal, clay, horn, glass or stone.

Much of Lithuanian ethnic crafts are useful products for day-to-day needs. These are wooden crafts (such as spoons, plates, furniture decorated in cut-through patterns), wicker-work baskets and furniture, patterned metal crafts, clay crafts (dishes, vases).

Handicrafts are sold to locals and as Souvenirs to tourists.
